Samsung Galaxy S3 Tab

Galaxy Tab S3 is a 10 inch (9.7") tablet released in 2017.

Installing TWRP

1. To install TWRP on the device it's best to use this chap's release and install via Heimdall:
2. `apt-get install heimdall-flash`
3. Once you have the files ready to go, put the tablet into download mode with Power + Vol Down + Home (hold for 10 seconds).
4. ```
   heimdall flash --RECOVERY ./Downloads/twrp-3.6.0_9-0-gts3lwifi.img --no-reboot
   ```
5. It's important to now reboot straight into recovery so that the old recovery partition is not recovered - Power + Vol Up + Home
6. Swipe to install TWRP

LineageOS

- Use LineageOS 19 this release is most stable
- Using NikGApps 12.1 (SL)
- From TWRP install the zip files.
