Fetch

The Fetch API was [adopted as a standard replacement for XMLHTTPRequest](#) in the last few years. It is usually available by default in browser code. However it is not offered out-of-the-box by Node.js

Cross-Fetch

The [cross-fetch](#) library provides cross-platform fetch API compatibility for node-like environments.

It can be installed with `npm i --save cross-fetch` .

It can be used as an ES6 module via

```
import fetch from 'cross-fetch';
```
