Python and Gitea

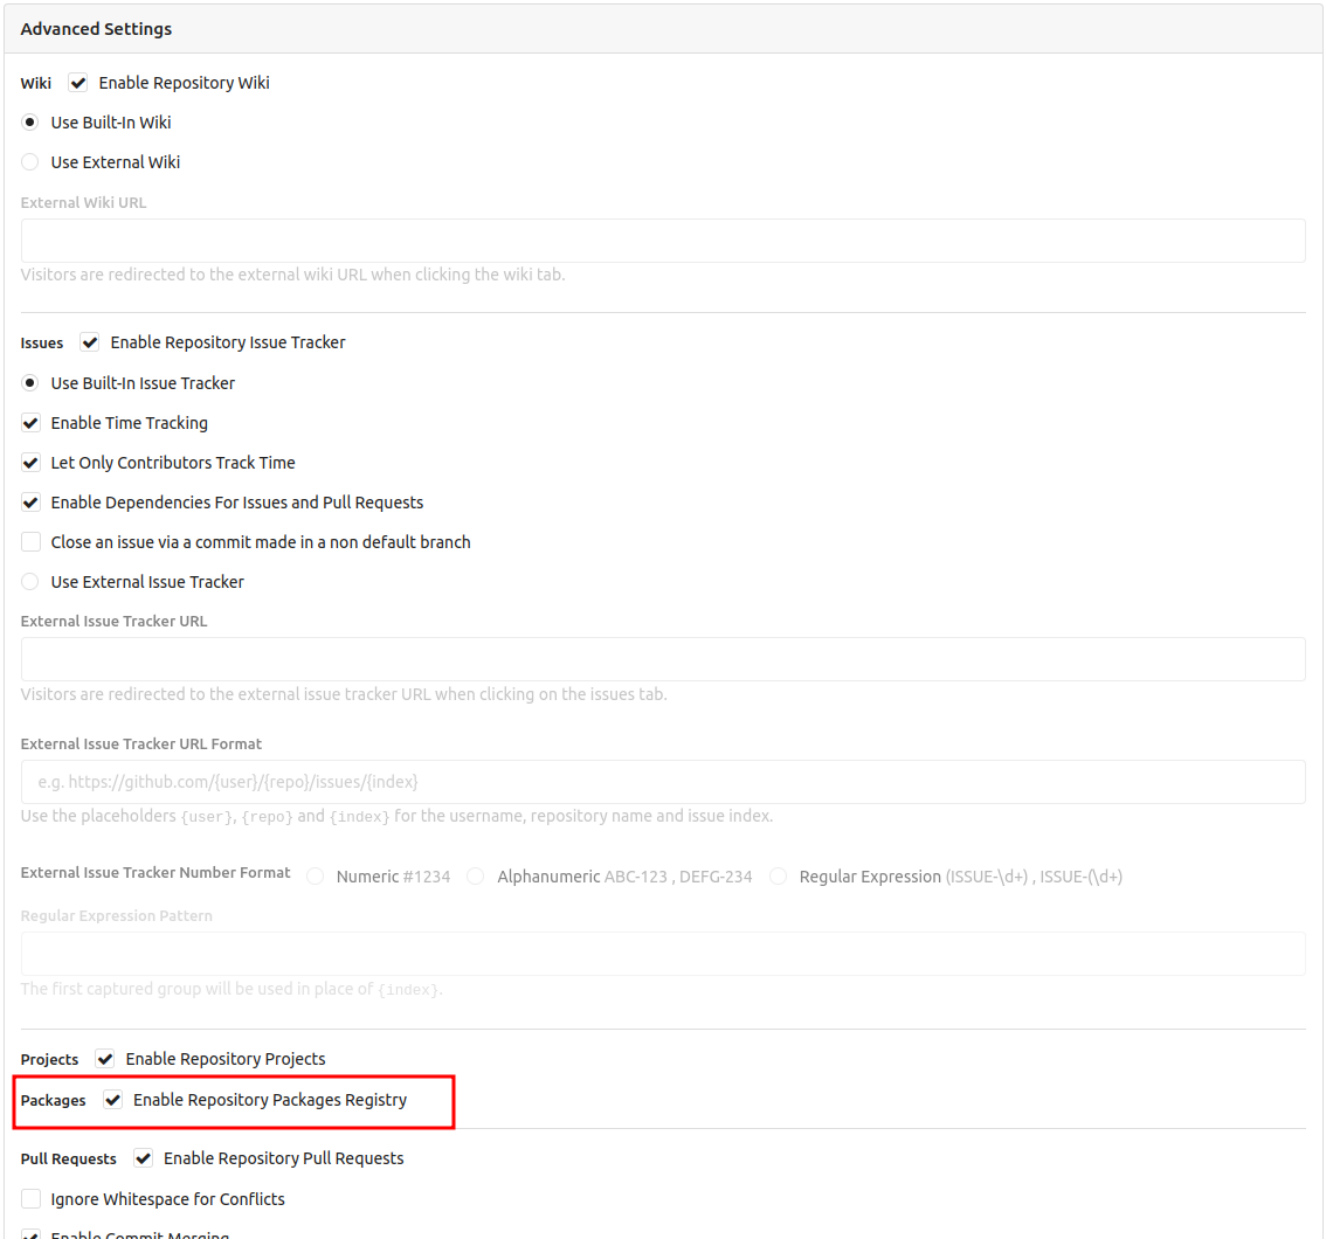

Tips and tricks for Python and Gitea and CI stuff.

Use Drone CI for Gitea

I use Drone + Gitea for code versioning and automation - I talk about it here

Gitea Package Management

Gitea recently added package management which means that compiled packages and docker containers can be stored alongside code - super useful. By default package hosting is turned off but you can turn it on per-project in the advanced settings section in your project settings:
